

## ABOUT METC:

Michigan Electric Transmission Company (METC) is a wholly-owned subsidiary of ITC Holdings Corp. (ITC), the largest independent electricity transmission company in the U.S. Based in Novi, Michigan, METC owns, operates and maintains approximately 5,600 circuit miles of transmission lines serving most of Michigan's Lower Peninsula. ITC's other operating company in the state, ITC *Transmission*, serves southeast Michigan. Together the two companies are known as ITC Michigan. Unlike traditional utilities, ITC focuses only on transmission, has no geographic constraints, and is independent from energy market participants. ITC therefore views the needs of the electric grid and its customers from a unique, holistic perspective.

## WHAT IS TRANSMISSION?

Transmission is the bulk delivery of electrical energy from power generating plants along high-voltage lines to the local distribution systems of utilities serving communities.

## QUICK FACTS:

- Established 2006
- Headquartered in Novi, Michigan; regional offices in Kawkawlin and Wayland, Michigan.
- Business unit lead: Simon Whitelocke, President, ITC Michigan
- Square miles of service territory: ~28,850
- Transmission circuit miles: ~5,600
- Transmission towers and poles: ~36,900
- Voltage Levels: 120 kV to 345 kV
- System peak load: 9,469 MW
- Stations and substations with ITC assets: 101
- Capital Investments: ~\$1.7 billion since 2006
- Member, Midcontinent Independent System Operator (MISO)
- METC has reduced the average number of outages on its system by 24% since ITC acquired the system in 2006. This improved reliability is the result of system investments over the years and our ongoing operations and maintenance program.

METC service area

## KEY PROJECTS:

- **Beecher-Samaria** – Reconstruction of a 22-mile, 138 kV line in southern Michigan to improve service reliability by replacing the current wood H-frames and steel lattice structures with double-circuit steel monopoles. Scheduled for completion second quarter 2019.
- **Amber-Donaldson Creek** – Reconstruction of a 20-mile, 138 kV line in western Michigan to improve reliability. Scheduled for completion fourth quarter 2019.
- **Battle Creek-Island Road** – Reconstruction of a 23-mile, 138 kV line in south-central Michigan to improve reliability. Completed second quarter 2017.
- **Morocco Substation** – A new substation in Deerfield Township, Michigan. Completed in 2015.
